Canada's Wildlife Health Program

WHAT we do

We promote and protect the health of wildlife and Canadians through leadership, partnership, investigation and action.

The Canadian Wildlife Health Cooperative [CWHC] is a “one-stop shop” that provides a Canada-wide perspective on wildlife health;

- Leading wildlife health strategies and programs
- Tracking wildlife health to know when to act
- Detecting emergence of new diseases
- Impacting policy and management decisions

The CWHC strives to be impactful and relevant in a rapidly changing world, supporting:

- Food safety and food security
- Public health and well-being
- Agriculture and the bio-economy
- Training wildlife health professionals
- Advocacy for wildlife health issues

CANADA NEEDS A WILDLIFE HEALTH PROGRAM

Did you know?

- Wild animals are integral to our economic well-being
- Interactions between wild animals and agriculture affect international trade and our food production
- Diseases shared between wild animals, domestic animals and/or people have the potential to adversely affect health

The CWHC provides:

- Surveillance for wildlife diseases & targeted programs for Avian Influenza, West Nile Virus, Snake Fungal, White-nose Syndrome and Rabies.
- Discovering new diseases and investigating new approaches to wildlife health issues through research and risk assessments
- Advocating for wildlife health and developing strategies to confront the effects of climate change and cumulative effects on wild animals.
